SUMMARY

Five years building frontend for two very different environments: a corporate portal running on legacy WordPress/PHP, and an early-stage SaaS product where every UI decision was mine to make. There's a particular satisfaction in dropping a Vue 3 component into a stack that's never seen one and watching it not break anything.

Currently also contributing to a security patch role at HPE(via OWL), a short-term addition alongside my core frontend work. Focused on growing specifically as a Vue frontend developer, going deeper into Vue 3 and Nuxt rather than spreading across frameworks. Looking for a team building an actual product, with room to grow technically.

EXPERIENCE

Frontend Developer

2023.04 - Present

OWL Technology Co., Ltd.

Japan | Remote

Development and maintenance of the company's corporate portal and external site.

- Built and maintained the corporate portal and external site with JavaScript / TypeScript, PHP and WordPress, used company-wide by 100+ employees.
- Integrated Vue 3 components into the existing WordPress / PHP stack, improving frontend performance by ~20% and modernizing key interfaces.
- Implemented access control (AJAX, JSON, tokens, role-based access) and led to full migration to a new domain and host with zero data loss.

Key skills: Vue 3, JavaScript, TypeScript, PHP 8, WordPress

Security Patch Engineer

2024.11 - Present

Hewlett-Packard Enterprise (HPE) (via OWL Technology)

Japan | Remote

- Executed security patch operations across production, DR and test environments (RHEL, Windows Server), within a large international corporate environment with strict process and documentation standards.

Key skills: RHEL 8.6, Bash, SQL, Oracle, Linux administration

Frontend Engineer

2021.07 - 2023.04

Legl

UK | Remote

Frontend development for an early-stage LegalTech SaaS product.

- Joined as an early frontend hire on a pre-product-market-fit SaaS platform, building core UI components (forms, modals, tabs, sliders) from the ground up with no existing design system to follow. Refactored legacy markup and CSS, improving load speed and mobile responsiveness.

Key skills: HTML, CSS, JavaScript, Responsive design

TECHNICAL SKILLS

- **Frontend (professional):** Vue 3 (Composition API), JavaScript ES6+, TypeScript, SPA, HTML5/CSS3, Responsive layout, Component architecture, Forms & validation, Legacy System Modernization
- **Frontend (personal projects):** Nuxt 4, Pinia, Supabase, Scalable UI Architecture
- **Tools:** Git/GitHub, npm, Vite, REST API, Supabase, Netlify, WordPress/PHP, AJAX/JSON, Role-based access
- **Backend & Infra:** PHP 8, MySQL, Oracle, Linux administration (RHEL), Bash, AWS (infra/ops)

SOFT SKILLS

Cross-cultural communication, self-directed learning, legacy code comfort, attention to detail, time management, result-oriented

EDUCATION

Specialist Degree: Physics & Informatics
Birk Branch of Bashkir State University, Russia

2009 - 2014

CERTIFICATIONS

HTML5 Professional Certification, Level 1 & 2
LanguageCert ESOL Achiever B2, High Pass
PHP8 Beginner Level Certification

LPIC Level 1
Oracle Master Bronze DBA
JLPT N1

PERSONAL PROJECTS

• IRON

iron-bygray.netlify.app

A mobile-first workout tracker with fully custom training programs, live set/rep/weight logging, supersets, drag-and-drop reordering, a rest timer, and a workout journal with editable history. Auth and data are backed by Supabase with row-level security.

• TaskFlow

taskflow-bygray.netlify.app

A task management app with a kanban board, drag-and-drop, subtasks, tags and search, and a persisted dark/light theme. Auth and data are backed by Supabase with row-level security.

• Portfolio

portfolio-bygray.netlify.app

An earlier collection of personal Vue 3 / Nuxt 4 experiments: SPA builds, API integrations, and UI/UX practice pieces.

LANGUAGES

English (B2), Japanese (JLPT N1), Russian (Native)
